Aashir ul Haque

Senior Software Engineer | Backend Systems and Agentic AI

Chicago area, Illinois | U.S. work authorized | aashirulhaque@gmail.com

Portfolio / GitHub / LinkedIn

Experience

Stats AI | Junior AI Engineer

August 2026 to present | Previously AI Engineering Intern, January to August 2026

Built retrieval and inference pipelines for review data, integrated language-model summaries, and developed evaluation and monitoring for model quality and latency.

Golootlo (DECAGON) | Software Engineer, then Senior Software Engineer

July 2019 to September 2025 | Senior Software Engineer from January 2022

Designed a shared payment service integrating 10+ gateways and built subscription billing and feature eligibility for a platform handling 35K+ daily subscription transactions.

Redesigned search for 50+ customer-facing APIs. Redis caching and query optimization reduced database load by 50%.

Implemented centralized payment logging and mentored backend engineers on AWS, microservices and payment architecture.

Selected project

Little Ummah Studio | Local multimodal AI

Built a video workflow with scene rendering, automated quality checks, bounded retries and human review before publication.

Technical skills

PHP / Laravel, Node.js / NestJS, Python, AWS, MySQL, Redis, Elasticsearch, SQS / SNS, PyTorch, retrieval-augmented generation and local inference.

Education

M.S., Information Technology | NED University of Engineering and Technology

B.S., Computer Science | University of Karachi
